Features & Specifications

Construction

Made from a compression molded, fiberglass reinforced polyester composite housing. An Anti-Siphon Chamber is provided to ensure no water can enter the main housing. ETL listed for wet locations.

Optical System

A variety of optical systems are available depending on the bullet size and wattage chosen. Up shields, down shields, and tube shields are all available. Contact the factory for additional options needed for specific applications.

Electrical System

Available with a 35W Metal Halide multitap CWA ballast. Pre-wired at specified voltage using a quick disconnect. Two 3/4" NPT and two 1/2" NPT conduit entries are provided.

Mounting

The Burial Box is designed for direct burial mounting with the appropriate backfill. See mounting instructions for specific information regarding installation.

Finish

Color impregnated composite box features Dark Bronze finish as the standard.

CBB SERIES 35W Metal Halide Bullet with Composite Burial Box
