#### **FEATURES & SPECIFICATIONS**

**APPLICATION** — The high performance luminaire is designed for full cutoff applications where long life, low maintenance, and consistent color rendering are required. Areas with limited accessibility due to fixture location or where heavy pedestrian traffic makes maintenance difficult are ideal applications such as building facade lighting or wall mounted security lighting. The contemporary design style of the luminaire allows it to be seamlessly integrated into existing systems when necessary.

**CONSTRUCTION** — The heavy duty housing is constructed of die cast aluminum. The optical assemblies are sealed in place using a silicone gasket for weather tight protection. IP66 rating available upon request.

**FINISH** — A Super Durable Polyester E-coat powder coat finish is electrostatically applied in our state of the art paint facility. Standard colors available: Black, Bronze, US Green, White. Custom colors available upon request.

**OPTICAL SYSTEM** — Made with a state of the art UV stabilized acrylic high performance refractive optical assemblies that use high transmittance materials to achieve precise photometric distributions. Available in Type II, III, and IV beam configurations. Star Light Friendly (meets or exceeds Dark Sky requirements) in the horizontal position.

**ELECTRICAL SYSTEM**—Available in a high output LED system in 5000K Cool White (+/- 500K), 4000K Neutral White or 3000K Warm White color. Available with 90-300V 50/60 Hz Class II power supply. LED's rated for over 100,000 hours at 55°C ambient temperature. Available with 120~277V 50/60 Hz power supply. 480V and 347V input option. Built-in surge protection up to 6 kV. Built-in Active PFC Function LED driver conforms to UL8750 standards.

# CTLW 1 SERIES

#### **Cutlass LED - Wall Pack**

**MOUNTING** — Quick mount bracket connects to a standard J-Box. The bracket has a unique hanging feature to allow easy wire connections. After connections are made, the fixture swings down and is secured with two retaining screws at the bottom of the fixture.

**LISTINGS** — LED Driver listed for wet locations. LED bricks ETL listed for wet locations. Meets US and Canadian safety standards. -40°C to 50°C ambient operation.

#### ORDERING INFORMATION

Choose the bold face options for the appropriate luminaire configuration for your application and enter on the line above each fixture attribute. Accessories may be factory installed, depending on the particular accessory chosen, but still be ordered as a separate line item.

EXAMPLE:

#### CTLW 1 N 8L T4 1 BZ SCE

# ACCESSORIES (Order as separate line items)

TLWSFSIR-100

Remote Handheld Sensor Configuration Tool (For IMS Option)

#### **NOTES**

- 1 = Multi-Volt is an auto ranging power supply from 100V to 300V input.
- 2 = Custom RAL color matching is available. Contact your sales representative for additional info.
- 3 = TLWSFSP-L3 or L7 Lens must be ordered along with this sensor.
- 4 = Photo control shield available upon request. Lens must be ordered with IMS option.
- 5 =P1000PC operates at 120V and PC3 operates at 208-277V only.
- 6 = If selecting the HOEB option alongside the IMS option, the IMS sensor will be 'externally mounted' outside of the fixture.
- 7 =WHBL1 Lens must be ordered along with the IMSBTM sensor.
- 8 =347-480V input available in 6L, 8L, and 10L ONLY.
- 9 = Reference Lumen Chart to identify CCT and Optic Type availability for 10L module. Some combinations may deviate from ordering logic shown above.

#### Integral Motion Sensor Blue Tooth Module (IMSBTM)

**APPLICATION** — The IMSBTM is an AC-powered, Integral Motion Sensor Blue Tooth Module, that is highly versatile for various indoor and outdoor lighting fixtures. It provides **360° coverage**, making it optimal for open spaces and aisleways. This sensor is particularly suitable for environments such as parking lots, fuel stations, walkways, and storage facilities. The WHBL1 lens is crafted for fixtures at mounting heights ranging from **20 to 40 feet**, ensuring a coverage span of up to **80 feet in diameter** at the maximum height of **40 feet**. These lenses are designed with multiple cells and tiers, creating a dense pattern of coverage.

- Analog Sensor Built-in
- Replaceable lens options
- 120-277V Line Voltage input
- Daylight harvesting available

**OPERATION** — Typically, the sensor ramps lighting On to the selected High mode level when motion is detected and the ambient light level is below the hold off setpoint. After the sensor stops detecting movement and the time delay elapses, lights fade to the Low mode level. If there is no motion during the subsequent cut off time delay, the lights will turn Off. For dusk to dawn control, the integral photocell can switch the lights On and Off based on the ambient light level so that lighting remains on overnight even without motion detection.

#### **ADDITIONAL FEATURES**

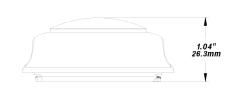

- Wireless Control System: Bluetooth® Low Energy Mesh 4.2 & 5.0 protocols. Enables individual or group control of luminaires.
- Mobile App Operation: Intuitive interface for easy management.
- Flexible Commissioning: Components commissioned via the Mobile App. No need for a gateway during commissioning.
- Sensor Integration: Works seamlessly with various sensors. Enhances energy efficiency and responsive lighting.
- Mesh Network Range: Wireless communication up to 100 feet or more between devices. Ideal for diverse spatial configurations.
- Internet Independence: Commissioning and operation without internet access. Ensures functionality in various environments.
- Security Measures: Data encryption for mesh network security. Device access restricted without encrypted QR codes.
- UL 1376 Verification: LiteTrace, the manufacturer, has UL 1376 verification. Ensures adherence to stringent security standards.
- In-House R&D Capabilities: Full-stack, in-house R&D for networked sensors and controllers. Reflects a high level of control and innovation.
- Industry Recognition: One of the first systems listed to DLC's Networked Lighting Controls (NLC5). Compliance with industry standards and specifications

# **FIXTURE MOUNT SENSOR (IMS)**

# **FEATURES & SPECIFICATIONS**

**APPLICATION**—The sensor is ideal for areas such as parking facilities, gas stations, pedestrian pathways, and warehouses. A choice of four lenses ensures complete coverage for mounting heights up to 40°.

**OPERATION** — Typically, the sensor ramps lighting On to the selected High mode level when motion is detected and the ambient light level is below the hold off setpoint. After the sensor stops detecting movement and the time delay elapses, lights fade to the Low mode level. If there is no motion during the subsequent cut off time delay, the lights will turn Off. For dusk to dawn control, the integral photocell can switch the lights On and Off based on the ambient light level so that lighting remains on overnight even without motion detection.

#### FEATURES -

- Provides line voltage On/Off switching
- High and low modes fully adjustable from 0 to 10V
- Time delay from 5 to 30 minutes
- · Optional cut off delay
- · Adjustable ramp up and fade down times
- Optional daylighting setpoints feature automatic calibration, or permit manual adjustment
- Polycarbonate construction; flame retardant, UV resistant, impact resistant, recyclable

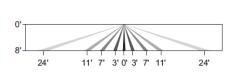

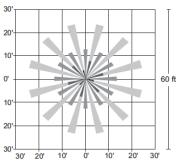

#### **SENSOR LENSES FIELD OF VIEW**

4 = Photo control shield available upon request. Lens must be ordered with IMS option.
